Honouring our working class communities across the world

Fun with Mathematics

Letting our students explore the amazing world of math

Creativity at its best

Enabling our students bring out their artistic side

MESSAGE FROM ACADEMIC TEAM

Education is the most powerful weapon which you can use to change the world.

~ Nelson Mandala

Dear Parents,

We thank you for joining us in our journey of involved learning, where each child is guided to steer the way towards excellence. April is a month of welcoming our new little learners to school. We always get excited to see our new comers inside the campus. It is a memorable day not just for students and parents but for teachers too!

ACTIVITIES & EVENTS

THE FIRST DAY OF SCHOOL

The first day of school is always special. It is that day when new students feel nervous as well as excited to meet new teachers, make new friends and explore the campus. We recently had the opportunity to welcome our Grade 1 students to the campus. As the little ones walked into the “big school”, we could see their faces light up with joy and eyes with curiosity and wonder for the new adventure awaiting them.

A GREEN TRIBUTE ON EARTH DAY

Earth Day is celebrated worldwide on 22nd April every year to bring awareness and to restore Earth's resources. GIG International School dedicated the day to appreciating the uniqueness of our planet and its incredible biodiversity with an aim to sustain a cleaner and greener environment. A colourful display of more than 130 collages and artwork brought the true spirit to the event. The day started with the appointment of the green ambassadors, who would be involved in green activities to be conducted throughout the year. The children had the opportunity to spend an interactive session via zoom with Ms Lavanya Prakash, an environmental advocate who talked about ways and means to restore our Earth. Later, prizes were distributed to the winners of the Lile Artis and Young Reporters competition for their stupendous work.

It was a happy occasion and the students had a good time. They witnessed the beautiful poster displays about Earth and learnt more on ways to 'Restore Our Earth'. GIG International School reiterated our Late Prime Minister Mr Lee Kwan Yew's legacy "Singapore the greenest and the cleanest country in the entire region" and installed the sense of responsibility amongst the students.

ACTIVITIES & EVENTS

THANKING OUR WORKERS ON LABOUR DAY

Labour Day is a special day to express our gratitude to the working class across the world and to commemorate the achievements of the labour movement. This day also reinstates the concept of dedicating ourselves to our tasks with passion, zeal and commitment, a philosophy GIG International School supports. As a part of the celebration, our students acknowledged the efforts put in by the most important members of the school and felicitated them with beautiful cards.

NUMBER PLAY WITH MATH MAGIC!

The month of April brought with it a lot of excitement as the children geared up for a series of events related to the magical subject Mathematics. A plethora of activities were planned and designed to give a chance to the children to explore and apply Mathematics beyond their classrooms. The events were spread across five weeks and each week gave children an interesting and distinct platform to peep into the different facets of Mathematics.

The students worked around Tangrams to create interesting animal figures, quilt patterns, polygons, solved colour coded mathematical equations, decoded and encoded messages, participated in scavenger hunts, solved sudokus and had a fun time blending art and math. The school also participated in one of the world's largest global educational events World Math Day on 5th of May.

It was a fun event as children got an excellent opportunity to connect and apply their Mathematical skills and had a good time exploring more about mathematics.

ACTIVITIES & EVENTS

CREATIVITY AT ITS BEST

Children across all classes had an enjoyable time exploring their aesthetic skills. They learned and created picturesque masterpieces during their Art Activity classes and CCAs.

Our students from Classes 1, 2 and 3 participated in the celebrations of Easter and Mother's Day with great enthusiasm. They created 3D Easter bunnies using paper strips and showed their love to their mothers by making paper flowers.

Students of Classes 4 and 5 made beautiful paper flower wall hangings using recycled materials which enhanced their fine motor and imaginative skills.

As an initiative to integrate art with unit of inquiry, students of Class 5 explored the human anatomy by representing a human body in different layers, starting from the outer covering and going to the organ systems. The children enjoyed and easily grasped different organ systems in such an easy yet wonderful way. Furthermore, Class 2 students created fruit baskets to connect with the ongoing topic of healthy eating habits.

Choosing the materials for craft, following the steps, and celebrating achievement of goals help learners to gain more confidence and enhance their social skills.
